

Exhibitions in recent years

At Keio University, we open our respective research institutes, exhibition venues, and specialist collections to the public. Each year we hold various exhibitions, including ones organised in conjunction with external bodies. Here we will introduce some events hosted in recent years.

KeMCo Keio Museum Commons

Collections & Exhibitions

Keio Museum Commons [KeMCo]

Keio Museum Commons (KeMCo) is an institutional apparatus with exhibition facilities that brings together research organs with artistic holdings in Keio University as well as various cultural and academic resources. Rather than confining itself to ties between the research and educational bodies of the university alone, it aims to link up with the Keio-affiliated schools, and is structured to serve as a hub encompassing the whole of Keio for use of collections and academic resources. In addition, it will play an active role in bringing together alumni, national and international researchers/ educational facilities and local communities, through KeMCo's activities in which students, academics and Keio staff will participate.

Exhibition facilities at Keio

There are currently multiple exhibition facilities available aimed at both internal and outside use at Keio.
